

BAKGEL

SANITATION GEL FOR HAND DESINFECTION

» **Features**

Neutral gel.

» **Properties**

BAKGEL does not foam, is not caustic, toxic, or irritating. Dries quickly without dehydrating the skin. Do not leave your hands slippery or greasy.

BAKGEL Sanitation gel ensures a quick hands disinfection without leaving harmful residues. You do not need water, or cleaning up after application.

» **Utilization**

BAKGEL is used in hospitals, clinics, veterinary clinics, kindergartens, nurseries, ambulances, laboratories, food industry, funeral, etc ...

» **Application**

BAKGEL should be applied in clean hands. Rub well in order to pass BAKGEL between the fingers and nails until it is completely dry.

Do not wash or clean after this operation.

» **Cautions**

Close the packing after each use. Do not mix with other products. Keep out of children reach. In case of contact with eyes, wash immediately with plenty of potable water. Always make a test to determine the compatibility and the appropriate contact time. Chemical product: Always read the label before using.

Food grade product, for disinfection of hands
