

BIOLAVE

CONCENTRATE ECOLOGICAL LIQUID FOR WASHING TEXTILES

» Features

Viscous liquid with a pleasant floral aroma.

» Properties

BIOLAVE is a concentrated product, miscible in water in all proportions.

BIOLAVE is a product not caustic, do not contain aggressive compounds, alkali salts and phosphates, and is very safe to use in all kinds of tissues.

Its action penetrating and enzymatic activity eliminates dirt, grease and food scraps.

The **BIOLAVE** new formula allows washes at low temperatures (30-60°C) for greater energy savings.

» Utilization

BIOLAVE allows be used in machinery or manually in any kind of fabrics such as cotton, synthetic fibres, silk, etc...

BIOLAVE is used in nursing homes, fire-fighters, nurseries, mercies, clinics, health centres, hospitals, etc ...

» Application

BIOLAVE is applied in proportion at 60 ml per 5 kg of clothes. See table below.

Heavily soiled clothes with food or grease stains, put some pure product over the stain before putting the machine.

» Cautions

Close the packing after each use. Keep out of children reach. Avoid prolonged contact with skin. Always make a test to determine the compatibility and the appropriate contact time. Chemical product: Always read the label before using.
