

## DETARTOCIME

ACID COMPLEX FOR CLEANING AND DESCALING

### » Features

Liquid product of yellow colour, odourless. Miscible with water in all proportions. **DETARTOCIME** contains corrosion inhibitors. Biodegradability higher than 90%.

### » Utilization

**DETARTOCIME** is used pure or diluted, for descaling lime deposits and cement on the floors or equipments.

### » Application

**To remove cement of mosaic floor, marble, granite, etc. ...**

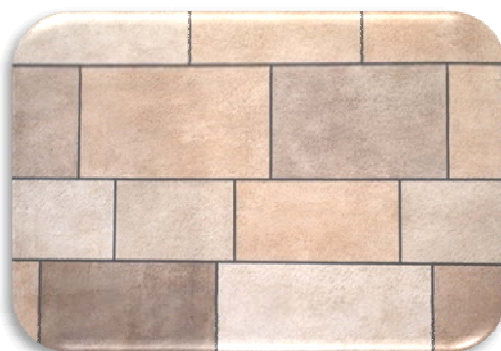

Depending on the amount of cement and the nature of the floor, **DETARTOCIME** can be diluted in proportion of 1 litre until 10 litres of cold water. Apply with a sponge, spray or mop. Then rinse with potable water and check the pH. If pH is low, use Acinetre in order to passivate all the clean surface.

#### Material cleaning:

Depending on the significance of dirtiness, dilute in the proportion of 1 litre until 5 litres of cold water. Apply with a sponge, mop or spray. Leave to act few minutes and then rinse with water and check the pH. If pH is low, use Acinetre in order to passivate all the clean surface.

### » Cautions

Very concentrated product. Keep out of children reach. Never mix with oxidizing agents (bleach). Avoid prolonged contact with light alloys or galvanized. Always carry out a test to determine the compatibility and the contact time appropriate. Chemical: Always read the label before using.

Produto de qualidade alimentar, no que concerne a limpeza de materiais e equipamentos que podem estar em contacto com produtos alimentares, uma simples limpeza com água potável é o suficiente antes da secagem.
